GLOBAL EXPOSURE AND EXPECTED LEVEL OF LEVERAGE

The Management Company uses a risk management process that allows monitoring the risks of the portfolio positions.

In financial mathematics and risk management, the value at risk (VaR) approach is a widely used risk measurement of the maximum potential loss for a specific portfolio of assets, due to market risk. More specifically, the VaR approach measures the maximum potential loss of such a portfolio at a given confidence level (or probability) over a specific time period (so called holding period) under normal market conditions.

The Management Company uses a risk management process that allows monitoring the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the managed funds at any time. In accordance with the amended Law of 17 December 2010 (the "Law") and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ("CSSF") the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company assures, at the basis of appropriate and reasonable VaR methodology described below, that the maximum potential loss of the portfolio according to applicable regulations does not exceed the 20% threshold of the net asset value of the portfolio. The Management Company uses the following methods:

1) Absolute VaR approach

In the period from 1 January 2022 to 30 June 2022 the absolute VaR approach has been used for monitoring and measuring the market risk for the funds under the VaR approach. The VaR has been calculated using a Monte-Carlo simulations with a confidence interval of 99%, a holding period of 20 days, over an observation window of 250 days, with no decay, under a full-revaluation framework.

2) Commitment Approach

The "commitment approach" is based on the positions of derivative financial instruments, converted into their corresponding underlying equivalents using the delta approach. Netting and Hedging might be considered for derivative financial instruments and their underlying assets. The sum of these underlying equivalents must not exceed the net asset value of the SICAV.

For the period ended 30 June 2022, the SICAV uses the commitment method for global risk management except for the following Sub-Funds for which the SICAV uses an absolute Value-at-Risk (VaR) approach:

- Eurizon AM SICAV - Active Beta
- Eurizon AM SICAV - Long/Short Euro
- Eurizon AM SICAV - Income Opportunities
- Eurizon AM SICAV - Strategic Bond
- Eurizon AM SICAV - Absolute Return Solution
- Eurizon AM SICAV - Global Absolute Bond Euro Hedged

The minimum, maximum and average VaR levels during the period ended 30 June 2022 are as follows:

	Historical VaR (1m, 99%) 01/01/2022 - 30/06/2022			Leverage Sum of Notionals 01/01/2022 - 30/06/2022

REMUNERATION POLICY

The Remuneration Policy of Eurizon Capital S.A. (hereinafter also referred as the "Company") is based on the principles applied in the Intesa Sanpaolo Group including:

– alignment with the interests of shareholders, customers and their assets under management, the medium and long term strategies and objectives, under a framework of reference rules aimed at avoiding conflict of interests, and at the proper control of current and future business risks and ensuring an adequate level of liquidity and capitalization;

– consistency with and promotion of sound and effective risk management and discouragement of risk-taking which is inconsistent with the risk profile, rules or instruments of incorporation of the assets managed;

The Remuneration Policy has been prepared on the basis of the Intesa Sanpaolo Group's remuneration policies and, for what is not in conflict, not governed or more restrictive, in compliance with European and national regulations governing the asset management industry:

– the Law of 12 July 2013 on alternative investment fund managers (transposing the EU Directive 2011/61/EU - the AIFM Directive), and

– the Law of 17 December 2010 relating to undertakings for collective investment (transposing the EU Directive 2014/91/UE - the UCITS V Directive).

Governance Structure

All incentives and reward systems for the Company's personnel are subject to the following types of conditions:

– activation conditions for the Group and the Company, consisting of liquidity, capitalisation and financial parameters;

– financing conditions of the mechanism of bonus funding for the Group and the Company, according to a top-down approach such as to take into account the exceeding of certain liquidity, capitalisation and financial parameters, in the first place at the level of the Group and, therefore, of the Company;

– individual access condition, meaning the level of achievement of the individual performance objectives, subject to the verification of the absence of individual compliance breaches. The individual performance objectives include financial as well as non-financial criteria.

The Board of Directors of the Company establishes and reviews annually the remuneration policy of the Company and ensures consistency with the overall policy of the Company in terms of risk-taking, the strategy and long-term, corporate governance structure and internal control objectives. It involves the Conducting Officers, each for their own responsibilities, in the definition and implementation of the Remuneration Policy.

The Company decided to entrust the Independent Directors Committee with the advisory and consulting functions aimed to support the Board of Directors in all activities relating to remuneration, defined in accordance with the principles set out in the ESMA Guidelines on sound remuneration policies (ESMA 232/2013 and 411/2016). The Committee is entirely composed of independent members. External persons can still participate in the meetings of the Committee in relation to specific items.

The internal process related to the governance of remuneration involves the Human Resources, the Risk Management, the Compliance and the Operations & Finance departments, each under the supervision of the respective Conducting Officer.

The Corporate Control Functions verify, for each area of competence (Risk Management, Compliance, Internal Audit), the alignment of the remuneration practices with the approved policies and the applicable regulations.

The ex-ante annual independent internal review of the remuneration system concluded its design to be appropriate.

Compensation Structure

The compensation of personnel includes:

- Fixed component, defined on the basis of the contractual category, the role held and the extent of responsibilities, reflecting the experience and skills required, as well as the quality of the contribution to corporate results;
- Variable component, linked to employee's performance and aligned with the annual results actually achieved and the risks prudentially assumed.

The criteria for the definition of the Company incentive systems, in application of the Intesa Sanpaolo Group's remuneration policy, aimed at ensuring the correlation between remuneration, performance and risks are, among others:

- the measurement of performance from multiple perspectives in order to align the management and employees behaviour to medium and long term strategic drivers, both quantitative (profitability, growth, productivity, cost of risk / sustainability) and qualitative (strategic actions or projects and managerial quality), on different perimeters (Group / Structure / Individual);
- the principle of selectivity, by differentiating the best performances and assigning higher bonuses;
- the principle of financial sustainability, by the definition of a bonus pool correlated to the performance of a Group parameter, currently identified as Income before tax from continuing operations and the use of a solidarity mechanism, according to which the amount of total bonuses paid to the employees of each Business Unit depends in part on the Group's overall performance (reflected in the size of the bonus pool) and in part on the degree of expected contribution to the Group's results;
- the definition of target bonus for roles and professional clusters to be used across all Group, in order to guarantee internal balance and the ongoing benchmarking between roles and/or professional clusters Group target bonuses and external market practices;
- the verification of the so-called individual compliance breaches as a restriction to bonus accrual (disciplinary measures, serious findings received from the Bank's control functions, sanctions by the Supervisory Authorities).

Vesting of the variable remuneration for Risk Takers is governed by specific rules in terms of:

- Deferral mechanisms;
- Payment partly in cash and partly in instruments and retention period for units/shares of funds;
- Ex-post adjustment mechanisms - malus or clawback.

Compensation for 2022

In accordance with the Law as of 17 December 2010 on Undertakings for Collective Investments (as subsequently amended) in conjunction with the guidelines on sound remuneration policies under UCITS published by the European Securities and Markets Authority (ESMA), the Company has identified individuals who have a material impact of the Company's risk profile (Material Risk Takers).

The regulations provide rules in relation to the variable component of the compensation of Risk Takers, indicating that:

- at least 40% of the variable component (60% for significant bonuses) must be subject to deferred payment for a period of 3 years (5 years for significant bonuses);
- a substantial portion (at least 50%) is paid out in units / shares of funds managed by the Company, or equivalent instruments; said percentage is applied, in the same proportion, to both the deferred and upfront portions of the variable component;
- there is a specific holding period (of no less than 2 years for the upfront component, and shorter for the deferred portion) for the vesting of the financial instruments referenced above.

In case the Variable Compensation is lower than EUR 80 000, the Material Risk Takers receive their entire Variable Compensation in cash without any deferral.

1. ACTIVITY

Eurizon AM SICAV, formerly known as Pramerica SICAV, hereafter referred to as the SICAV, is an open-ended investment company established in the Grand Duchy of Luxembourg on 27 March 1991 for an unlimited period of time. The SICAV is governed by the provisions of Part I of the Luxembourg amended Law of 17 December 2010 relating to Undertakings for Collective Investment.

The SICAV is an open-ended investment company with multiple Sub-Funds, i.e. it is composed of several Sub-Funds separately invested in accordance with their respective investment policies and objectives.

This structure offers investors the advantage of being able to choose between different Sub-Funds and to move without cost from one Sub-Fund to another.

The SICAV is managed by Eurizon Capital S.A. as its designated Management Company governed by the Chapter 15 of the Law of 17 December 2010.

The objective of the SICAV is to offer its shareholders easy access to the various investment markets, while abiding by the principle of the spreading of risks. In principle, all the securities acquired are quoted on an official stock exchange or traded on a regulated, recognised market which operates legitimately and is open to the public.

The SICAV's sole purpose shall be the investment of its assets in transferable securities and money market instruments of all kinds and/or in other assets referred to under the Law with a view to spreading investment risks and enabling its shareholders to benefit from the results of its management. The SICAV undertakes to comply with the investment limits as described in the Law.

In the context of its objectives, the SICAV will be able to offer a choice of several Sub-Funds, which are managed and administered separately. The investment objectives and policies to be pursued in each Sub-Fund are described in each of the supplements relating to each Sub-Fund in the Prospectus. In the context of its investments, the assets of a specific Sub-Fund are only liable for the debts, liabilities and obligations relating to this Sub-Fund. Each Sub-Fund is treated as a separate entity between shareholders.

All Sub-Funds are denominated in Euro and all assets and liabilities of each Sub-Fund are valued in Euro. As at 30 June 2022, 49 Sub-Funds were active.

The Board of Directors of the SICAV may issue one or more share classes for each Sub-Fund. The cost structures, the minimum provided for the initial investment, the currency in which the net asset value is expressed and the eligible investor categories may differ depending on the different share classes. They may also be differentiated on the basis of other objective factors as determined by the Board of Directors of the SICAV.

The current Prospectus and the Key Investor Information Document (KIID) are available free of charge on request from the SICAV's registered office.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Presentation of the financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities ("UCITS") and with generally accepted accounting principles. The financial statements reflect the Net Asset Value as calculated on 30 June 2022 based on latest available market prices of the investments.

The figures of each Sub-Fund are presented in EUR that is the base currency for all of them, the combined financial statements are presented for information purposes only. The combined statement of net assets and the combined statement of operations and changes in net assets are the sum of the statement of net assets and the statement of operations and changes in net assets of each Sub-Fund converted into the currency of the SICAV using exchange rates prevailing at the closing date.

All cross Sub-Fund investments related amounts have not been eliminated from the calculation of the combined figures. As at 30 June 2022 the total cross Sub-Fund investments amounted to EUR 242 172 778,87 and therefore the Total Combined Net Assets at period end without cross Sub-Fund investments would have been EUR 13 455 733 822,09.

b) Investments in securities and money market instruments

The value of all portfolio securities and money market instruments or listed derivatives that are listed on an official stock exchange or traded on any other regulated market are based on the last available price on the principal market on which such securities or money market instruments or listed derivatives are traded, as furnished by a recognised pricing service approved by the Board of Directors of the SICAV. If such prices are not representative of the fair value, such securities, money market instruments or derivatives as well as other permitted assets, the value of such securities and money market instruments or listed derivatives is defined by the Board of Directors of the SICAV based on the reasonably foreseeable sale proceeds determined prudently and in good faith.

The value of securities and money market instruments which are not quoted or dealt in on any regulated market are based on the last available price, unless such price is not representative of their true value; in this case, they may be valued at a fair value at which it is expected that they may be resold, as determined prudently and in good faith by and under the direction of the Board of Directors of the SICAV.

The value of the investment in investment funds shall be based on the last available valuation. Generally, investment in investment funds will be valued in accordance with the methods described in the instruments governing such investment funds. These valuations shall normally be provided by the fund administrator or valuation agent of an investment fund. To ensure consistency within the valuation of each Sub-Fund, if the time at which the valuation of an investment fund was calculated does not coincide with the valuation time of any Sub-Fund, and such valuation is determined to have changed materially since it was calculated, then the Net Asset Value may be adjusted to reflect these changes as determined in good faith by and under the direction of the Board of Directors of the SICAV.

The value of an investment represented by a UCI/UCITS in which the SICAV invests may be affected by fluctuations in the currency of the country where such UCI/UCITS invests, or by foreign exchange rules, the application of various tax laws of the relevant countries, including withholding taxes, government changes or variations of the monetary and economic policy of the relevant countries. Furthermore, it is to be noted that the Net Asset Value per share will fluctuate mainly in light of the net asset value of the targeted UCI/UCITS. Investments in other investment funds may for the investor result in a duplication of management fees and other operating fund related expenses.

c) Valuation of other assets

The value of any cash in hand or on deposits, discount notes, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received, are deemed the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof are arrived at after making such discount as the Board of Directors of the SICAV may consider appropriate in such case to reflect the true value thereof.

d) Valuation of derivatives

- Swaps Transactions

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Credit Default Swaps are valued by reference to the net present value of the expected future cash flows based on the market interest rates and the markets expected default and recovery rate of the underlying asset. Total Return Swaps are valued by reference to the mark to market value based on the market value of the underlying asset. The estimated market value is based on the valuation elements laid down in the contracts, and is obtained from third parties pricing agents, market makers or internal models.

Unrealised profits and losses on swap contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on swap contracts".

The caption "Swap premium received" and "Swap premium paid" of the Statement of Net Assets correspond to the amount paid or received by the Fund when contracting a credit default swap. This amount stands for the cost of the relating swap contracts.

All the Swap contracts are presented at clean price, therefore the interests related to Swap contracts (except for total return swap contracts which are presented at dirty price) are recorded under the heading "Interest received/paid on swap contracts" in the Statement of Changes in Net Assets.

- Options contracts

Outstanding options traded on a regulated market are valued at the last available market price on the valuation date. Over-the-counter (OTC) options are valued based on prices received from third party pricing agents or internal model. The net realised profit / (loss) and change in net unrealised appreciation / (depreciation) arising at the time of reporting from the valuation of options trades are taken into account in the Statement of Operations and Changes in Net Assets.

- Valuation of forward foreign exchange contracts

Unrealised profit / (loss) resulting from outstanding forward foreign exchange contracts is determined on the valuation date on the basis of the forward rates applicable on that date and is recorded net in the Statement of Net Assets. The net realised profit / (loss) and change in net unrealised appreciation / (depreciation) is recorded in the Statement of Operations and Changes in Net Assets. The unrealised profit / (loss) on forward foreign exchange contracts are disclosed in the Statement of Net Assets under «Net unrealised profit / (loss) on forward foreign exchange contracts».

- Valuation of futures contracts

Futures contracts are valued using quoted daily settlement prices established by the stock exchange on which they are traded. The SICAV and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract (the "variation margin"). For open futures contracts, changes in the value of the contract are recognised as net unrealised profit and loss are recorded in the Statement of Net Assets. When the contract is closed, the difference between the proceeds (or cost) of the closing transactions and the original transaction is recorded as a net realised profit or loss and change in net unrealised appreciation / (depreciation) in the Statement of Operations and Changes in Net Assets. The unrealised profit / (loss) on futures contracts are disclosed in the Statement of Net Assets under «Net unrealised profit / (loss) on futures contracts».

- Options on futures contracts

In the case of options on futures, no premium margin is required because a daily profit or loss adjustment (variation margin) is made by the procedure known as "mark-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains or losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process.

e) Dividend and interest income

Dividends are shown net of withholding tax deducted at source, and are recorded as income on the ex-dividend date. Interest income is accrued on a daily basis.

f) Contract for Differences

At each valuation date the difference between the opening price and the current market price of the underlying security to the contract for difference is recorded as net unrealised profit / (loss) contracts for difference in Statement of Net Assets. When the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a net realised profit / (loss) and change in net unrealised appreciation / (depreciation) in the Statement of Operations and Changes in Net Assets.

As at 30 June 2022, no Sub-Fund was investing in Contracts for Differences.

g) Foreign currency translation for each Sub-Fund

The accounts are maintained in EUR and the financial statements are expressed in that currency. Assets and liabilities expressed in currencies other than the Sub-Fund's currency are translated into the Sub-Fund's currency at the exchange rates applicable as at year-end. Income and expenses in currencies other than the Sub-Fund's currency are translated into the Sub-Fund's currency at the exchange rates applicable at the transaction date.

h) Net realised profit / (loss) on sale of investments

Investments in securities are accounted for on a trade date basis. Net realised profit / (loss) on sale of investments in securities are based on the average cost basis. The net realised profit / (loss) and change in net unrealised appreciation / (depreciation) on investments are recorded in the Statement of Operations and Changes in Net Assets.

i) Valuation of securities lending

The SICAV may lend securities included in its portfolio to a borrower through a third party broker. The assets continue to be valued as part of the portfolio of the SICAV. If the prices of securities lent are not representative of their fair value, all such securities will be valued at their fair value at which it is expected they may be resold as determined in good faith by or under the direction of the Board of Directors of the SICAV. Securities lending generates additional income for the SICAV according to the contracts; the remuneration is recorded as "Income from securities lending" in the Statement of Operations and Changes in Net Assets.

j) Unrealised capital gain tax on investments

Accrued at each NAV calculation, a capital gain tax on Indian and Thai securities is payable when selling a stock with a profit.

The currencies used to calculate the tax are Indian Rupee (INR) and Thai Baht (THB). The capital gain tax calculation is as follows: Tax% * (Market Value in security currency - Book cost in security currency) * Exchange rate of the day

The change in net unrealised appreciation / (depreciation) on unrealised capital gain tax is recorded in the Statement of Operations and Changes in Net Assets.

k) Placement fee

For all Sub-Funds, a placement fee is charged to the Class "F" shares, amounting to 4,00%, Class "U" shares, amounting to 2,60% and Class "Primaclasse" shares, amounting 2,40%, at the time of each subscription; such fee is amortized over the first four years (five years for the Class "Primaclasse" shares) following each subscription by daily charge on the total net value of the share class.

The amortization of the placement fees is recorded in the Statement Changes in Net Assets under the caption "Other charges and taxes". The capitalized amount of the placement fees is recorded in the Statement of Net Assets under the caption "Other assets".

l) Rebates

The SICAV may receive rebates of part or all of the management or distribution fees from the underlying target funds. These rebates are recorded under caption "Other income" in the Statement of Operations and Changes in Net Assets.

m) Contingent assets

As at 30 June 2022, some of the Sub-Funds of the Fund are involved in some collective legal actions ("Class Actions"). In the context of these procedures, these Sub-Funds could receive, with no certainty, compensations related to losses occurred in the course of previous financial years. The fee has been calculated on the Initial Price multiplied by the number of shares outstanding on the first Valuation Day. This fee covers the activity of the sales intermediary which is mostly concentrated in the start-up phase due to the structure of the Sub-Fund for which requests for subscriptions received after the initial subscription period or after the extension of the initial subscription period are not considered.

Such fee has been recorded as an asset in the Statement of Net Assets under the caption "Other assets" and is amortized over a 5-year period. This asset was reduced during the period by a part of the redemption fee described below, corresponding to the unamortized fraction of the start-up fee related to the redeemed shares. The amortization of the start-up fees is recorded in the Statement of Changes in Net Assets under the caption "Other charges and taxes".

5. TAXATION

Under legislation and regulations in Luxembourg the SICAV is subject to an annual subscription tax ("taxe d'abonnement") of 0,05% per year. This tax rate is reduced to a rate of 0,01% per year in respect of the net assets attributable to such classes of shares which are reserved for institutional investors within the meaning of, and as provided for in, Article 174 of the Law of 17 December 2010. Such tax is payable and calculated quarterly, and it is based on the total net asset value of the relevant class of shares on the last day of every calendar quarter. The subscription tax does not apply to the part of the assets of the SICAV that are invested in other Luxembourg undertakings for collective investment already subject to the "taxe d'abonnement".

6. OTHER CHARGES AND TAXES

The heading "Other charges and taxes" is mainly composed of amortization of placement and start-up fees as well as administration, correspondent bank, transaction, distribution, audit, printing, risk management and amortization of placement fees. As at 30 June 2022, for all Sub-Funds concerned, the amortisation balance of start-up fees amounted to EUR 3 821 198,63 and of placement fees amounted to EUR 34 048 926,48.

18. SECURITIES LENDING TRANSACTIONS

The SICAV may enter into securities lending transactions provided that they comply with the rules applicable to undertakings for collective investment when they use certain techniques and instruments relating to transferable securities and money market instruments, as amended from time to time. The SICAV may only lend or borrow securities through a standardised system organised by a recognised clearing institution or through a first class financial institution specialised in this type of transactions subject to prudential supervision rules considered by the "Commission de Surveillance du Secteur Financier" (CSSF) as equivalent to those prescribed by Community law (The law of the European Union as established by treaties and cases of the EU courts) and must be evaluated and approved by the SICAV. In all cases, the counterparty to the securities lending agreement (i.e. the borrower) must be subject to prudential supervision rules considered by the "Commission de Surveillance du Secteur Financier" (CSSF) as equivalent to those prescribed by Community law. In case the aforementioned financial institution acts on its own account, it is to be considered as counterparty in the securities lending agreement.

Each Sub-Fund must ensure that the volume of the securities lending transactions is kept at an appropriate level or that it is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations and that these transactions do not jeopardize the management of the Sub-Fund's assets in accordance with its investment policy.

As at 30 June 2022, no Sub-Fund was engaged in any securities lending program.

During the period no income was earned from the securities lending.

19. CHANGES IN THE COMPOSITION OF PORTFOLIO

Upon request to be addressed to the registered office of the SICAV a copy of the statement of changes in the portfolio for the period ended 30 June 2022 is available free of charge.

20. EVENTS OCCURRED DURING THE PERIOD

On 14 February 2022, the Registrar and Transfer Agent of the SICAV changed to State Street Bank International GmbH, Luxembourg Branch.

Since February 2022, a number of countries and organizations (including the US, UK and EU) have imposed sanctions against certain entities and individuals in Russia as a result of the official recognition of the Donetsk People Republic and Lugansk People Republic by the Russian Federation and military operations initiated by Russia against the Ukraine. The situation, together with growing turmoil

from fluctuations in commodity prices and foreign exchange rates, and the potential to adversely impact global economies, has driven a sharp increase in volatility across markets. The Directors regarded these events for the Fund and any of its Sub-Funds as non-adjusting events during the reporting period. Although neither the Fund's and any of its Sub-Funds performance and going concern nor operations, at the date of this report, have been significantly impacted by the above, the Directors continue to monitor the evolving situation and its impact on the financial position of the Fund and any of its Sub-Funds.

SECURITIES FINANCING TRANSACTIONS REGULATION

Securities Financing Transactions Regulation ("SFTR") came into force on 12 January 2016 and introduces new disclosure requirements in annual and semi-annual reports published after 13 January 2017 detailing use of securities financing transactions.

A security financing transaction is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement,
- securities or commodities lending and securities or commodities borrowing,
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction.

As at 30 June 2022, the Fund held no total return swap contracts which is type of securities in scope for the SFTR annual report Disclosure Requirements.

As at 30 June 2022, there is no collateral on total return swap contracts.

Sustainable Finance Disclosure Regulation (SFDR)

Starting from 10 March 2021, in accordance with the Regulation (EU) 2019/2088 (Sustainable Finance Disclosure Regulation – “SFDR”), the Management Company amended its Sustainability Policy describing the financial instrument selection and monitoring methodologies adopted by the Management Company in order to include the sustainability risk analysis as part of its decision-making process on investments relating to collective asset management services. On 30 June 2021, the Management Company also published the policy related to the Principal Adverse Sustainability Impacts pursuant the provisions of (i) Article 4 of Regulation (EU) 2019/2088 and (ii) the related implementing regulations. Based on the Management Company's amended Sustainability Policy and assessments of the process set-up by each delegated investment manager, presence of minimum ESG processes and objectives have been set for each category corresponding to Articles 6, 8 or 9.

The Management Company adopts screening methodologies of issuers, aimed at identifying those operating in sectors considered not “socially responsible” (SRI Restrictions) as well as those characterized by a high exposure to environmental, social and corporate governance risks (ESG Restrictions or “critical issuers”). The Management Company has also adopted a specific “Engagement Policy”, adopting specific organisational and/or procedural measures that regulate the participation in the Shareholders’ Meetings and the comparison (so-called “engagement”) with the companies considered relevant.

The above listed Sub-Funds are managed by considering environmental, social and governance (ESG) criteria when assessing investment risks and opportunities pursuant to Article 6 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability reporting in the financial services industry. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

In addition to integrating sustainability risks into investment decisions, the Management Company considers ESG factors in the analysis and selection of financial instruments with the aim of achieving an ESG score, calculated at the overall portfolio level, which is higher than the ESG score of the investment universe or of the benchmark, if any, using data from the specialized info-provider “MSCI ESG Research”. The ESG score of the Sub-Fund is calculated as a weighted average of the ESG scores of the issuers of the financial instruments in the portfolio. Alternatively, the Sub-Funds Social 4 Future and Social 4 Planet, integrate the ECPI Methodology that identifies the investible universe and best-in-class issuers by applying negative and positive screening.

Without prejudice to the integration of sustainability risk analysis, all Sub-Funds belonging to the umbrella Fund do not, however, promote the specific environmental objectives identified in Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 establishing a framework for sustainable investment and amending Regulation (EU) 2019/2088. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

Outcome
